

# Curriculum Vitae

Dr Michael Lydeamore  
Department of Econometrics and Business Statistics  
Monash University  
Email: michael.lydeamore@monash.edu

## APPOINTMENTS HELD

|                                                               |           |
|---------------------------------------------------------------|-----------|
| <b>Senior Lecturer - Econometrics and Business Statistics</b> | 2021-     |
| Monash University                                             |           |
| <b>COVID-19 Modelling &amp; Forecasting Lead</b>              | 2020      |
| <b>Manager, Analytics</b>                                     |           |
| Department of Health and Human Services, Victoria             |           |
| <b>Postdoctoral Research Fellow</b>                           | 2019-2021 |
| Monash University                                             |           |
| <b>Honorary Team Member</b>                                   | 2019-     |
| SaferCare Victoria                                            |           |
| <b>Honorary Research Fellow</b>                               | 2019-     |
| Alfred Health                                                 |           |
| <b>Research Fellow</b>                                        | 2018-2019 |
| The Kirby Institute, University of New South Wales            |           |

## EDUCATION

|                                                                                                                       |           |
|-----------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Doctor of Philosophy - Applied Mathematics</b>                                                                     | 2015-2019 |
| The University of Melbourne                                                                                           |           |
| Thesis title: Mechanistic and statistical models of skin disease transmission                                         |           |
| <b>Masters of Philosophy - Applied Mathematics</b>                                                                    | 2013-2014 |
| The University of Adelaide                                                                                            |           |
| Thesis title: Approximations of stochastic household models for comparing antiviral allocation schemes                |           |
| Awarded the Applied Probability Trust prize for the highest mark with a project in Applied Mathematics and Statistics |           |
| <b>Bachelor of Mathematical Sciences</b>                                                                              | 2010-2013 |
| The University of Adelaide                                                                                            |           |
| Graduated with a double major in applied and pure mathematics                                                         |           |

## PUBLICATIONS

### PREPRINTS

## SOFTWARE

### R PACKAGES

#### **blockstrap**

CRAN

Sample dataframes by group, in the form of a 'block bootstrap'. Entire groups are returned allowing for a single 'observation' to span multiple rows of the dataframe.

Coauthors: Michael Lydeamore, Cash Looi, Kenyon Ng, Mitchell O'Hara-Wild

#### **cardinalR**

CRAN

A collection of functions to generate a large variety of structures in high dimensions. These data structures are useful for testing, validating, and improving algorithms used in dimensionality reduction, clustering, machine learning, and visualization.

Coauthors: Jayani P. Gamage, Dianne Cook, Paul Harrison, Michael Lydeamore, Thiyanga S. Talagala

#### **condensr**

CRAN

Helps automate 'Quarto' website creation for small academic groups.

Builds a database-like structure of people, projects and publications, linking them together with a string-based ID system. Then, provides functions to automate production of clean markdown for these structures, and in-built CSS formatting using CSS flexbox.

Coauthors: Michael Lydeamore

#### **HospitalNetwork**

CRAN

Set of tools to help interested researchers to build hospital networks from data on hospitalized patients transferred between hospitals. Methods provided have been used in Donker T, Wallinga J, Grundmann H. (2010) <doi:10.1371/journal.pcbi.1000715>, and Nekkab N, Crépey P, Astagneau P, Opatowski L, Temime L. (2020) <doi:10.1038/s41598-020-71212-6>.

Coauthors: Pascal Crépey, Tjibbe Donker, Clément Massonnaud, Michael Lydeamore

#### **mapycusmaximus**

CRAN

Focus-glue-context (FGC) fisheye transformations to two-dimensional coordinates and spatial vector geometries. Implements a smooth radial distortion that enlarges a focal region, transitions through a glue ring, and preserves outside context. Methods build on generalized fisheye views and focus+context mapping. For more details see Furnas (1986) <doi:10.1145/22339.22342>, Furnas (2006) <doi:10.1145/1124772.1124921> and Yamamoto et al. (2009) <doi:10.1145/1653771.1653788>.

Coauthors: Alex Nguyen, Dianne Cook, Michael Lydeamore

#### **quollr**

CRAN

To construct a model in 2-D space from 2-D nonlinear dimension reduction data and then lift it to the high-dimensional space. Additionally, provides tools to visualise the model overlay the data in 2-D and high-dimensional space. Furthermore, provides summaries and diagnostics to evaluate the nonlinear dimension reduction layout.

Coauthors: Jayani P. Gamage, Dianne Cook, Paul Harrison, Michael Lydeamore, Thiyanga S. Talagala

## VS CODE EXTENSIONS

### Code Comment Viewer

[Open VSX](#)

Show all HTML comments in the current file in a sidebar and highlight them in the editor.

Version 0.1.3

### Comment Tracker

[Open VSX](#)

Track comments with author and timestamp for QMD and other files

Version 1.0.0

### Quarto: Open Rendered File

[Open VSX](#)

Open an existing rendered output for a Quarto document without rendering it again.

Version 1.1.1

## FUNDING

Almost all of this funding was obtained in partnership with large, collaborative teams.

### SPARKLE

2024

Department of Foreign Affairs and Trade

Awarded value: \$5,000,000

### SHIELD: Surveillance of Healthcare-associated Infections for Effective Local Data

2025

NHMRC

Awarded value: \$2,000,000

### Modelling Work in Low and Middle Income Countries in the Western Pacific Region for the COVID-19 SAGE Working Group

2024

World Health Organisation

Awarded value: \$8,157

### Modelling To Support Australia's Resilience to and Preparedness for Omicron And Future Sars-Cov-2 Variants

2024

Commonwealth Government of Australia

Awarded value: \$80,059

### Contractual Partner to Conduct Research on Healthcare-Associated Infection Rates in Phillippine Hospitals

2023

World Health Organisation Phillippines

Awarded value: \$72,078

### Centre of Western Public Health Unit

2023

Contract Research

Awarded value: \$25,000

### Extending and comparing methods for projecting social contact matrices

2022

SPECTRUM/SPARK Seed Funding

Awarded value: \$19,438

### Quantifying longitudinal relationships between community mobility and COVID-19 case incidence in west metropolitan Melbourne

2022

SPECTRUM/SPARK Seed Funding

Awarded value: \$19,896

### Modelling to support Australia's national plan for COVID-19

2021

Commonwealth Government of Australia

Awarded value: \$147,536
